

## **CEPS Seminar on 'Combating Counterfeiting and Illicit Trade. Business Practices and Policy Direction on ICT Traceability and Authentication'**

Wednesday 10 May 2017, Brussels

The Centre for European Policy Studies (CEPS) in cooperation with MSLGROUP, was host to a seminar that examined the business practices and latest policy developments in the fight against counterfeiting and the illicit trade. The third in a series of fora, the event had a particular focus on ICT traceability and authentication but looked at more broadly at the issue from data on source markets to the technology and systems that can be used to fight this growing crimes. CAIT was represented by Craig Stobie of Domino contributing to the panel discussion 'Business Practices and Standards to Enhance Traceability and Authentication through Technologies'.

For a detailed overview of the presentations and discussions at the seminar, please consult the [CEPS event link](#).
